

December 15, 2025: Letter to San Antonio City Council

I am writing to, again, remind you of the ongoing illegal spying operation that is coming from the United States military presence that is stationed here in San Antonio, Texas.

I am experiencing an ongoing use of veterans and government-related people to 'engage' my life with sign language and other 'non-verbal' communications that are indicating that my computer work is being spied upon, that my movements are being illegally surveilled and that I am essentially being stalked and threatened by criminals that are embedded within the United States national 'security' apparatus as it is currently being managed by the Republican Party of Texas and America.

Please relay this information to the other members of City Council, State of Texas, and the United States of America to inform them that they are being illegally spied upon and subject to possible extortion from criminals that are residing within the United States military.

I hope that my experience can be helpful in expressing to you and your associates what a modern criminal conspiracy looks like in America and across the world.

From my research and personal experience, I can confidently express that this criminal conspiracy is being conducted by the 'Freemason' 'Secret' Society which has numerous buildings and 'Lodges' around our community - in fact, I understand that they are even the current owners of the former Federal Courthouse in downtown San Antonio (currently known as the 'Perfect Union Masonic Lodge #10').

Please share this information with everyone that is currently holding any ability to help the general public at this time so that they can be 'on guard' and 'aware' of their need to maintain the upmost of morals so that they do not unintentionally become victims of the illegal spying operation currently being conducted by and through the country's military.

Thank you for your attention to this very important matter.

Kindest regards,

Chris Carlin
